

Primary Care Consent Data Reports

The Ministry of Health and Long-Term Care (ministry) is providing the enclosed monthly Consent Data Report to report on preventive care and outside primary care services for enrolled patients who have granted consent for the release of specific types of personal health information.

Claims information appearing on the Consent Data Report should not be used for payment reconciliation purposes to address outside use and access bonus payment issues as not all claims listed on the report contribute to the outside use access bonus payment calculation. For example, ocular-visual assessments and services provided by an identified General Practitioner (GP) Psychotherapist will appear on the report but do not contribute to outside use.

In response to feedback from physicians with respect to the content and utility of various reporting documentation provided by the ministry to physicians, the Primary and Community Care Committee (PCCC) have organized a Data and Reporting Working Group with representation from the ministry and the Ontario Medical Association (OMA). To meet your needs, the Working Group is implementing improvements to the existing Consent Data report to reflect only codes relevant to outside use access bonus payment calculations. Details of these enhancements will be provided when the revised forms are completed.

Disclaimer

To ensure patient privacy and protection of personal health information, these reports must be treated as highly confidential. The patients have authorized the ministry to release this information to their primary care physicians by signing the *Consent to Release Personal Health Information form, the Patient Enrolment Form and Consent to Release Personal Health Information or the Patient Enrolment and Consent to Release Personal Health Information Form*. Please report any loss, damage or inappropriate use of this information immediately to the ministry.

If you have any questions regarding this report, please contact your Site Team or the Ministry Help Desk at 1-800-262-6524 or in the Kingston area (613) 548-7981.
